

Macros for AVR Assembler Programming

Macro_reference.pdf is the reference manual.

Macro_Platform_01 is an AVR studio project provided for viewing the sources and experimenting.

The source files are:

AVR_basic_macros_x.asm
common_subs_x.asm

x denotes the release number.

In a project, both sources are to be included.

AVR_alternative_basic_macros_x.asm is an additional source containing macros with alternative word-register mnemonics. When using, all three sources are to be included within the project.
